Farmingville, NY - At the May 24, 2011 Town Board Meeting Councilman Dan Panico, along with the entire Town Board awarded the construction contracts for the Manorville Ambulance Headquarters.

After the bids were received and opened in the Town's Division of Purchasing for the project known as "Manorville Community Ambulance" it was recommended to the Town Board that the contracts be awarded to the responsible lowest bidders. Upon approval by the board and receipt of all required insurance and/or bonding, the contracts were awarded as follows: The contract for the HVAC for the project was awarded to JNS Heating Service. The contract for the plumbing and fire sprinkler for the project was awarded to Ambrosio & Company, Inc. The contract for the electrical and fire alarm system was awarded to Roland's Electric Inc. and the contract for the general construction for the project was awarded to VRD Contracting, Inc.

"The members and officers of the Manorville Ambulance Company will soon have a much needed new headquarters to call home as a result of the passage of a series of resolutions to award the construction contracts last Tuesday," commented Brookhaven Town Councilman Dan Panico. "Manorville Ambulance serves one of the largest geographic areas in New York State and has consistently done more with less, and has worked to ensure that this building is not only environmentally friendly, but also taxpayer friendly in working to cut costs. I am proud to support them in all that they do and as a resident of Manorville I thank them for their service to the community."

The new Manorville Community Ambulance Headquarters project has been a partnership with the leaders of the Manorville Community Ambulance and the Town of Brookhaven for many years. The project received a lot of attention and gained momentum in 2008 when the late Councilman Keith Romaine came into office and toured the Manorville facility finding that there was an overdue need to provide a headquarters that would not only offer the tools and facility needed to perform the current day to day ambulance services but would afford the room for the needed growth into the future as the Manorville community has grown exponentially over the past few years.

"On behalf of the Officers and Members of the Manorville Community Ambulance, please allow me to thank Councilman Panico for all of his hard work and effort now that the Town of Brookhaven has awarded the contracts for the construction of our new Headquarters Building on South Street. From all the meetings of the planning stage through finalizing the drawings and layout of the building, Councilman Panico and his staff have always been on top of everything," said Joseph W. Kukral, Chief of the Manorville Community Ambulance. "Councilman Panico's constant reassurance that everything will meet deadline and be accomplished has always been above and beyond. We believe the many years of waiting will be worth it once our building is completed. Once again we would like to thank Councilman Panico for his tireless efforts and continued support of the Manorville Ambulance; we look forward his your continued support of our efforts to provide state-of-the-art medical care to the residents of Manorville and the Town of Brookhaven."

Now with the approved contracts, the demolition of the old building and the construction of the new building should commence quickly.
