December 21, 2012
Farmingville, NY - "There are early indications that wash overs on Fire Island, combined with heavy rains may have contributed to the flooding that has impacted Mastic Beach and other communities along the south shore. Officials from the Town's Public Safety Department are currently assessing the situation and we have mobilized high water vehicles to Mastic Beach Village to assist in any way needed. We will also dedicate whatever Town resources are necessary to help during this emergency. I once again urge the Federal and State governments to immediately replenish the dunes on Fire Island that were destroyed by Sandy and to address the breaches that were created during the storm to make sure that severe flooding of the mainland does not become a commonplace occurrence in the future."
