

Town of Brookhaven Boater Awareness

Let's Work Together to
Keep Our Waters Clean

Why Boaters?

No one is more aware of the impacts we have to our coastal waters than boaters. Boaters are some of the most conscientious residents in the Town of Brookhaven. Unfortunately the mere act of using and maintaining a boat can result in unintentional sources of pollution.

As a boat owner / operator you have a responsibility to ensure that our coastal waters remain healthy and pristine; for the sake of your community and future generations.

Join with your fellow boaters to
Keep Brookhaven Waters Clean!

Boat Maintenance

Use biodegradable detergents and cleaning compounds.

Wash by hand above the water line.

Removal of bottom paint **MUST** be done in a contained area, away from the water.

Engine repair and disassembly should be done indoors.

Keep it Clean on the Water

Stow it, don't throw it!

Use absorbent pads around deck fill and no spill devices at the fuel vent.

Use an oil-absorbent bilge sock.

It is illegal to discharge sewage into the water. Take advantage of the Town's free pumpout facilities in your area.

Reduce grey water discharges by doing dishes and showers on shore whenever possible.

Stormwater and You

The purpose of the Town of Brookhaven's Stormwater Program is to protect surface waters. Surface waters include lakes, ponds, rivers, streams, creeks, bays, harbors, and the ocean.

Protecting our surface waters is easier than you might think. Be aware of your actions. Keep garbage, waste and toxic chemicals out of the water.

PUMPOUT FACILITIES
