March 23, 2015

Farmingville, NY - On March 20, Supervisor Ed Romaine (right) and Councilman Dan Panico (left) visited Brookhaven Calabro Airport while work was being done to install 63 new energy efficient electronic ballast lighting fixtures. The new fixtures are replacing inefficient PCB ballast fixtures. The new lighting will be 50% more energy efficient than the old ones and produce a whiter, brighter light. The Town will soon replace the old lighting at the Brookhaven Animal Shelter and Adoption Center with the same new energy efficient lighting.

In his 2015 State of the Town Address, Supervisor Romaine announced an "Energy Efficiency and Sustainability Initiative" as part of a 5 year Capital Plan to achieve a 50% reduction of Greenhouse Gas (GHG) emissions by 2020. The plan will focus on Town-owned Buildings and Facilities, Traffic Controls, Street Lights and Town Vehicles. Pictured with Supervisor Romaine and Councilman Panico is Christopher Herbert (IBEW local 25), from electrical contractor J.P. Daly and Sons.
