June 11, 2013

**Farmingville, NY** - Brookhaven Supervisor Ed Romaine, Superintendent of Highways Dan Losquadro and Councilman Tim Mazzei met with residents of the Grandview Avenue area of Blue Point to detail plans to fix a longtime drainage problem in the area.

Problems with the existing drainage in the area has resulted in flooding of the roadways and the property of residents during heavy rains, creating a mess for anyone living there or trying to navigate the roads. The new multi-pronged project will clean up the problem with a comprehensive plan to alleviate flooding and improve drainage away from private property.

The plan calls for adding two drains to the east side of Clearview Place, tying them into the existing drains on the west side of the street. Clearview Place will also be re-pitched to allow for the street to drain out. At the same time, the Town will re-grade, pave and properly pitch Grandview Avenue, install new curbing, and coordinate all work with LIPA, the Suffolk County Water Authority, National Grid and other utilities. In addition, deteriorated bulkheads in the area will also be replaced.
